

Vo Huynh Thien Bao

Mechatronics Engineering Intern

26/09/2005 | 0869048527 | thienbao05lhu@gmail.com | Male
Quarter 4, Buu Long, Bien Hoa, Dong Nai

PROFESSIONAL SUMMARY

Senior Mechatronics Engineering student oriented towards automation systems and mechanical design. Possesses solid foundations in CAD/CAM modeling, PLC programming, as well as practical experience in machining, electrical wiring, and assembly. Eager to learn, adapt rapidly, and contribute practical value to enterprise engineering operations.

PROJECTS & COMPETITIONS

2026 - 2027 **Vietnam Robocon Creative Contest 2026 | Team Member**
Designed 3D mechanical structures, machined components, and assembled robot chassis; supported electrical wiring, sensor calibration, and PID motor control programming.

2025 - 2026 **Automation Machine Design Contest 2026 | System & Mechanical Designer**
Formulated machine concepts, calculated mechanical tolerances and cycle time, selected pneumatic & electrical components, and budgeted bill of materials (BOM) and project milestones.

2023 - 2024 **Automated Material Feeder Winch Machine | Control & Mechanical Developer**
Engineered 3D mechanical structure, conducted fabrication and mechanical assembly, wired control circuitry, and programmed operational sequences.

EDUCATION

2023 - 2027 **Lac Hong University (LHU) | Mechatronics Engineering**
Academic Standing: Good (GPA: 7.56 / 10.0 for completed coursework)

CORE SKILLS

- Teamwork & Cross-functional Collaboration
- Industrial Electrical Wiring & Panel Assembly
- Technical Drawing & P&ID Schematic Reading
- PLC Programming (Siemens S7-1200, Omron)
- Mechanical Design (SolidWorks), Machining & Fitting
- AutoCAD: 2D Engineering Drawings & Layouts

CERTIFICATIONS

10/2025 **3S / 5S Industrial Workplace Safety & Organization Certification**

07/2024 **Certified SOLIDWORKS Associate in Mechanical Design (CSWA) — Dassault Systèmes**
